Quality Assurance

Dimensional Check

Every Glassware produced is checked for dimensional accuracy to ensure the items in lot are identical in shape and size

Residual Strain Test

High end Polariscopes are used to check the residual strain in product.

Enamel Tests

All Glassware are assessed for chemical resistance of enamels used for colour coding and colour marking as per ISO 4794 to ensure the enamels stay consistent even after repeated use and washing.

Leakage Check

All Stopcocks are checked for any form of leakage first individually and then post attachment.

Optical Clarity

Visual Inspection for optical clarity is done for each item.

Joint Fitting Check

Dimensions and fitting of all sockets & cones are checked for proper taper ensuring zero leakage on use.

Calibration

All Volumetric products are precisely calibrated in controlled environment in ISO 17025 certified Calibration Laboratory using state of the art Automatic Calibrated Machines and highly accurate Balances.
